RE: Testimonial for Brightcode.

Brightcode installed a new server in to our office in January 2009. They made sure all systems were operational and that minimal disturbance was maintained throughout the process.

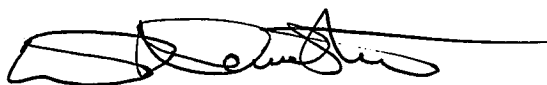

Since January they have provided constant IT Support to our office as and when we required it, travelling to the office when on-site support was necessary. The phone support has been equally superb. A response is always given and we have never been left waiting for a reply.

Brightcode has ensured that all our IT problems have been solved quickly and efficiently, offering the best and most cost efficient methods.

Overall Brightcode has provided a more than competent and especially attentive support to all our IT needs. They are thoroughly recommended by all members of the staff, who find them not only helpful but also very approachable.

Should there be any further questions regarding Brightcode's work we would be happy to answer them.

For and on behalf of
